About the Jane Goodall Institute

Founded in 1977, the Jane Goodall Institute continues Dr. Goodall's pioneering research on chimpanzee behaviour — research that transformed scientific perceptions of the relationship between humans and animals. Today, the Institute is a global leader in the effort to protect chimpanzees and their habitats. It also is widely recognized for establishing innovative community-centred conservation and development programmes in Africa, and Jane Goodall's Roots & Shoots, the global environmental and humanitarian youth programme, which has groups in more than 130 countries.

About Jane Goodall's Roots & Shoots

Founded in 1991 by Dr. Jane Goodall and a group of Tanzanian students, the Roots & Shoots programme is about making positive change happen — for our communities, for animals and for the environment. With hundreds of thousands of young people in more than 130 countries, the Roots & Shoots network connects youth of all ages who share a desire to create a better world. Young people identify problems in their communities and take action. Through service projects, youth-led campaigns and an interactive website, Roots & Shoots members are making a difference across the globe.
